

Magnum Tapes & Films supplies customers with a comprehensive selection of well-known pressure-sensitive adhesive tapes. TRIED & TRUSTED adhesive tapes are our most popular rubber and acrylic tapes and are consistently in stock. These tapes are suitable for a wide variety of applications due to their versatility. Our highly skilled sales and technical teams are ready to help you select the best adhesive for your most challenging and exciting applications.

	TAPE		ТҮРЕ	LINERS*	LINER SIDE ADHESIVE	CARRIER	AIR SIDE ADHESIVE	APPLICATIONS
200 SERIES	RUBBER High Tack Rubber		200 Series is an aggressive rubber foam bonding adhesive that adheres well to ether and ester polyurethane and polyethylene foams. This adhesive is more conformable to a wide range of irregular and uneven substrates. Sticks to anything rough.					
	R-240	R-240 Double Coated		76# PCK	2.0 mil 200 Series	.5 mil Clear PET	2.0 mil 200 Series	A 8 3
	R-242	R-242 Double Coated		76# PCK	2.5 mil 200 Series	.5 mil Clear PET	2.0 mil 200 Series	
400 SERIES	RUBBER General Purpose Rubber		400 Series is a versatile permanent rubber tape. Ideal for smooth surfaces where the heavy adhesive thickness is not required. The right balance of economy and performance. Excellent bonding to polyethylene, polyisoprene, polystyrene, polypropylene, EPDM, metals, papers, and other flat surfaces. Good dimensional stability with excellent die-cutting performance. Very high shear properties and high peel performance. Available with a tighter release liner, ideal for converting.					
	R-428	R-428 Double Coated		53# SCK	1.1 mil 400 Series	.5 mil Clear PET	1.1 mil 400 Series	
	R-442	R-442 Double Coated		60# SCK	1.1 mil 400 Series	.5 mil Clear PET	1.3 mil 400 Series	() ()
500 SERIES	PERMANENT High Tack Rubber		500 Series is a versatile foam bonding adhesive for polyethylene, rubber, and EPDM foams. Aggressive initial tack with excellent peel and surface wet-out. Superb adhesive for irregular and hard-to-stick surfaces such as polyethylene foam. A PET carrier provides exceptional dimensional stability in die-cutting with a standard lay-flat liner—an excellent adhesive for case applications and available as a transfer tape.					
$\not\equiv$	R-511	R-511 Double Coated		54# SCK	1.3 mil 500 Series	4.5 mil Crepe	1.3 mil 500 Series	
600 SERIES		A C R Y L I C Acrylic		600 Series is an excellent option for bonding various complex materials and surfaces, such as polyurethane foams, TPO materials, ABS, Polyethylene, Polypropylene, and powder-coated materials. The 600 Series is a standard lay-flat liner, an LSE adhesive that is conformable with excellent wet-out properties. Low VOC properties meet JIS-A 1901 standards.				
///	A-624	A-624 Double Coated		76# PCK	2.0 mil 600 Series	.5 mil Clear PET	2.0 mil 600 Series	8
800 SERIES	A C R Y L I C Shear Acrylic		800 Series is a versatile permanent acrylic transfer tape. It is a stiff adhesive with exceptional die-cutting performance. Excellent adhesion to plasticized PVCs, metals, and LSE plastics. Conformable to irregular surfaces with superior outdoor performance. High shear with moderate peel and high-temperature performance. Low VOC 800 Series properties meet JIS-A 1901 standards, are acid-free, and have a neutral pH for archival applications. Meets the ISO 18916 standard for photographic archiving.					
	A-808	A-808 Double Coated		76# PCK	2.0 mil 800 Series	.5 mil Clear PET	2.0 mil 800 Series	
900 SERIES	DOUBLE-SIDED DIFFERENTIAL			900 Series tapes are differential tapes with a different adhesive on each side. They are available in Rubber/Rubber, Acrylic/Acrylic, and Acrylic/Rubber configurations. We can mix and match our rubber and acrylic adhesives to fit a specific need.				
\\\	D-935 Differential		76# PCK	1.4 mil 400 Series	.5 mil Clear PET	2.0 mil 200 Series	4 8 8 3	
\\\\	D-939 Differential		53# SCK	1.1 mil 400 Series	.5 mil Clear PET	1.8 mil 200 Series	4 8 8	
2000 SERIES		RUBBER High Tack and High Temperature Rubber		2000 Series rubber adhesive is a high-performance, permanent, pressure-sensitive adhesive designed for strong, reliable bonding. Engineered for compatibility with polyethylene and polyurethane foams, it delivers excellent initial tack and adhesion across a wide range of substrates. Featuring aggressive bonding strength on both sides of a double-coated polyester film, this adhesive is ideal for demanding applications such as gaskets, seals, trims, and die-cut parts in the appliance, automotive, construction, and foam fabrication industries.
